Company Profile:

Techior Solutions Pvt.Ltd is a School ERP software product company that helps take care of all operations in schools and colleges. The software comes with many features that help various departments take care of their day to day activities. Customers across India and overseas are very happy with software and product support quality.

Product Details

Software helps manage Student, Teacher, Classes, Sections, Fees, Attendance and Marks. Software provides easy reports like CBSE-CCE, Outstanding fees, Marks, Attendance etc. This is a MUST HAVE software for all schools. For quite some time we have been asked by several peoples to develop software that is focused on school requirements. School Magica is developed after collecting requirements from several schools. The product is very easy to use and considers that most operators are not technology savvy people or typical geeks. The software guarantees saving of money and time for management apart from organizing the school information. Over 50 reports are available at a click of a button to have all the details of the School. New reports added for ID card and Student Details for counseling parents detailing payment, Attendance, Marks etc.
